

BREAK THROUGH REGULATORY BARRIERS TO CAPTURE MARKETS

Export controls and economic sanctions

Your company, technologically innovative and commercially dynamic, is asking itself the right questions concerning the sensitivity of its products, the countries of their development and the regulations that constrain it.

Your products are innovative and therefore sensitive:

- Are your technologies used in the development of strategic products?
- Are your innovations of interest to the French authorities?
- Do your products contain sensitive foreign components (USA, Germany, UK...)?

Your countries of business development are diversified:

- Can your products only be developed internationally?
- Do any of your activities involve high-risk countries?
- Is a sensitive shareholder (Russian, Chinese...) present in your capital?
- Do you need technological partnerships with foreign manufacturers?
- Do you want to control your relationship with customs regarding the nature of your exports?

The regulations are multiple and confusing:

- You are unsure about the regulations that control your most advanced products (ML? BDU? CIEEMG? CIBDU? BAFA? Wassenaar?)
- Do you want to measure and control the risks associated with exporting the technologies you develop?
- Do you need to reassure your shareholders, your banks and your employees that your operations are compliant?
- Are you subject to an on-site inspection by the Customs or the Direction Générale des Armements?

JH Société d'Avocats practices in the field of export control in the aeronautics, IT, telecommunications and defense sectors.

We partner with foreign law firms and recognized experts to provide you with solutions through the following services:

✓ Internal Compliance Program

The ICP puts the criminal and image risks associated with exports of military equipment and dual-use goods “under control”.

JH Société d'Avocats assists you in the internal organization of your export control, from the introduction of the ICP to the management of your internal and external controls.

✓ Legal and technical advice

The legal and technical advice of JH Société d'Avocats enables you to prevent and, if necessary, manage legal challenges arising from the export of sensitive products: company audit, classification of a complex system, logistical scheme, countries under embargo, documentary or on-site inspection by the DGA or the customs authorities, etc.

✓ Training

In the same fields, with its consulting experience, JH Société d'Avocats offers you training programs adapted to your sector of activity: executives, shareholders, compliance committee, operational functions.

✓ Outsourced assistance

JH Société d'Avocats assists you in your administrative formalities: license applications, reporting to the administration, declassification of your products, export record keeping, etc.

✓ Support for the implementation of extraterritorial laws

JH Société d'Avocats establishes an impact analysis of the American operational rules (EAR and ITAR), using, if necessary, American firms specialized in embargoes and sanctions in their country.
